Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7 and 11-24, drawn to a method and system for searching a database of available hardware models, classified in class 707, subclass 1.
 - II. Claims 8-10, drawn to a method for specifying a set of requirements for said Web infrastructure, classified in class 709, subclass 220.

2. The inventions are distinct, each from the other because of the following reasons:

Invention I and II are related as subcombinations disclosed as usable together in a single combination. In the instant case, invention I has separate utility such as in a system lacking the method for specifying a set of requirements for said Web infrastructure. See MPEP § 806.05(d).

3. These inventions are distinct for the reasons given above and the search required for each Group is different and not co-extensive for examination purpose. For example, the searches for the two inventions would not be co-extensive because these groups would require different searches on PTO's classification class and subclass as following:

(a) the Group I search (claims 1-7 and 11-24) would require use of search **class 707, subclass 1** (not require for the invention II).

(b) the Group II search (claims 8-10) would require use of search **class 709,**

subclass 220 (not require for the invention I).
